NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(in Canadian dollars)

1. STATUTE OF INCORPORATION, NATURE OF ACTIVITIES AND GOING CONCERN

Ariane Phosphate Inc. (“the Company”), was incorporated under Part IA of the *Companies Act* (Quebec) and was continued under the *Business Corporations Act* (Quebec) (QBCA). The Company is engaged in the development of its Lac à Paul phosphate property located in Quebec, Canada. The Company has a National Instrument 43-101 compliant technical report for its mineral reserve and resource estimate and for a feasibility study on the Lac à Paul property. In October 2018, management determined that the technical feasibility and commercial viability of the Lac à Paul property had been established and accordingly, the development phase for the Lac à Paul property has commenced.

The Company’s shares are listed on the TSX Venture Exchange (symbol DAN), on the Frankfurt exchange (symbol JE9N) and on the US Stock Exchange Over-the-Counter (OTC) (symbol DRRSF). The registered office of the Company is located at 393 Racine Street, Suite 200, Chicoutimi, Quebec, Canada G7H 1T2.

Although management has taken steps to verify titles of mining properties in which the Company has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company’s title. Property title may be subject to unregistered prior agreements and non-compliant with regulatory requirements.

These condensed consolidated interim financial statements have been prepared based on accounting principles applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, 12 months from the end of the reporting period. For the period ended March 31, 2019, the Company recorded a net loss of \$631,282 (loss of \$696,480 for the period ended March 31, 2018) and has an accumulated deficit of \$49,230,509 as at March 31, 2019 (\$48,599,227 as at December 31, 2018). In addition to ongoing working capital requirements, the Company must secure sufficient funding to meet its obligations and pay general and administration costs.

As at March 31, 2019, the Company had a negative working capital of \$6,231,215. Management estimates that the working capital will not be sufficient to meet the Company’s obligations and budgeted expenditures through March 31, 2020. These circumstances lend significant doubt as to the ability of the Company to meet its obligations as they come due and, accordingly, the appropriateness of the use of accounting principles applicable to a going concern. The Company will need to secure additional financing in 2019.

Any funding shortfall may be met in the future in a number of ways including, but not limited to, the issuance of new equity, debt financing or securing capital from potential partners. While management has been successful in securing financing in the past, there can be no assurance that it will be able to do so in the future or that these sources of funding or initiatives will be available to the Company or that they will be available on terms which are acceptable to the Company. If management is unable to obtain new funding, the Company may be unable to continue its operations, and amounts realized for assets might be less than amounts reflected in the condensed consolidated interim financial statements.

These condensed consolidated interim financial statements do not reflect the adjustments to the carrying values of assets and liabilities, expenses and financial position classifications that would be necessary if the going concern assumption was not appropriate. These adjustments could be material.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting, as issued by the International Accounting Standards Board (“IASB”).

The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company’s annual consolidated financial statements for the year ended December 31, 2018. These condensed consolidated interim financial statements should be read in conjunction with the Company annual consolidated financial statements for the year ended December 31, 2018, which have been prepared in accordance with IFRS as issued by the IASB.

The Board of Directors approved these condensed consolidated interim financial statements on May 29, 2019.

New accounting policies adopted in the current quarter

IFRS 16, Leases

In January 2016, the IASB issued IFRS 16. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract, which is the customer (“lessee”) and the supplier (“lessor”). IFRS 16 replaces IAS 17, Leases, and related interpretations. All leases result in the lessee obtaining the right to use an asset at the start of the lease and, if lease payments are made over time, also obtaining financing. Accordingly, IFRS 16 will eliminate the classification of leases as either operating leases or finance leases as is required by IAS 17 and, instead, introduces a single lessee accounting model. Applying that model, a lessee is required to recognize: i) assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value; and ii) depreciation of lease assets separately from interest on lease liabilities in the statements of income. The new standard is effective for annual periods beginning on or after January 1, 2019 with early adoption permitted if IFRS 15 is also applied. The standard has been adopted for the period beginning on January 1, 2019. The Company has not a significant impact based on actual lease contracts of the Company.

IFRIC 23 Uncertainty over Income Tax Treatments

On June 7, 2017, the IASB issued IFRIC Interpretation 23 Uncertainty over Income Tax Treatments. The interpretation provides guidance on the accounting for current and deferred tax liabilities and assets in circumstances in which there is uncertainty over income tax treatments.

The interpretation is applicable for the annual period beginning on or after July 1, 2019. Earlier application is permitted. The Interpretation requires an entity to:

- contemplate whether uncertain tax treatments should be considered separately, or together as a group, based on which approach provides better predictions of the resolution;
- reflect an uncertainty in the amount of income tax payable (recoverable) if it is probable that it will pay (or recover) an amount for the uncertainty; and
- measure a tax uncertainty based on the most likely amount or expected value depending on whichever method better predicts the amount payable (recoverable).

The Corporation intends to adopt the Interpretation in its financial statements for the period beginning on July 1, 2019. The extent of the impact of adoption of the Interpretation has not yet been determined.

There was no transfer of hierarchy level as at March 31, 2019 and December 31, 2018.

Financial risks

The Company has exposure to various financial risks, such as credit risk, liquidity risk, interest rate risk, equity risk and currency risk from its use of financial instruments.

Credit risk

The Company's credit risk is primarily attributable to cash and cash equivalents and receivable and other current assets. Cash and cash equivalents are deposited in Canadian chartered bank accounts or invested in a diversified manner in securities having an investment-grade rating (AA-), from which management believes the risk of loss to be minimal. Receivable and other current assets mainly consist of sales taxes receivable and mining tax credits due from the Quebec government. Management believes that the credit risk concentration with respect to financial instruments included in amounts receivable is minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or related to matters specific to the Company. The Company generates cash flows primarily from its financing activities. As at March 31, 2019, the Company had cash and cash equivalents of \$822,955 (\$2,076,731 as at December 31, 2018) to settle current liabilities of \$7,226,526 (\$7,786,230 as at December 31, 2017).
